Art Unit: 2685

### **DETAILED ACTION**

#### Information Disclosure Statement

1. The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered. The prior art filed on 2/23/2000 the form 1449 is missing, therefore, the examiner has not been considered the IDS.

## **Drawings**

2. The drawings are objected to under 37 CFR 1.83(b) because they are incomplete. 37 CFR 1.83(b) reads as follows:

When the invention consists of an improvement on an old machine the drawing must when possible exhibit, in one or more views, the improved portion itself, disconnected from the old structure, and also in another view, so much only of the old structure as will suffice to show the connection of the invention therewith.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

As to fig.2B, figure 2b fails to show "recessed actuating means 105" as disclosed on page 8 of the disclosure.

Applicant's disclosure specifies figure 3 as , "a pictorial representation of the wireless radio frequency link as used with the personal safety signaling apparatus 10",

however, fig.3A does not convey such a representation. Figure 4 as specified in the disclosure is missing.

Appropraite correction is required.

# Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

# Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Sheffer (us 5,515,419).

As to claims 1 and 4, Sheffer discloses a personal safety signaling apparatus (figs. 1 and 10) comprising: a first communication means (phone unit 110), said first communication means for transmitting an emergency radio signal (col.11, lines 25-29). Sheffer discloses an activation means (116) for initiation said first wireless communication means (col.2, lines 40-46, col.11, lines 35-36). Sheffer discloses a first wireless link (11 and 111) for receiving said emergency radio signal, (col.11, lines 4-5) said first wireless link capable of communicating the presence of emergency radio signal to a central monitoring station via a second wireless link (17) (col.5, lines 19-25,col.11, lines 25-29 and figs.1 and 10). Sheffer discloses the central monitoring

Application/Control Number: 09/511,527

Art Unit: 2685

station (14) capable of determining the location of said first wireless link (11) via triangulation of said emergency radio signal, (col. 8 lines 50-56 and figs.1 and 6-8) a said central monitoring staion (14) further capable of alerting an emergency response vehicle via another conventional alert method "dispatch" (col.9 lines 45-50).

As to claims 2 and 5, Sheffer discloses a microphone(119 of fig.11). Sheffer disclose a second wireless communication means (portable phone 110 is in a audio mode,), the second wireless communication means capable of communicating audible input acquired by said microphone to said first wireless link (col.12 lines 8-11, col.12 lines 32-33).

As to claim 3, Sheffer discloses said first wireless link comprises a cellular telephone signal receiving tower (16) (figs.1 & 10 and col.11, lines 25-29).

#### Conclusion

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bickley et al (us 5,969,673) disclose a technique of triangulation to determine the position of emergency emitting radio terminal (fig.1).

  Raith et al (us 6,073,005) disclose an emergency apparatus (200 of fig.2) includes panic button (260)(col.4 lines 14-21) and further more, Raith disclose location finding technique triangulate to position of the mobile unit 530, col.6 lines 10-21).
- 6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

Application/Control Number: 09/511,527

or faxed to:

(703) 872-9314, (for formal communications intended for entry)

Or:

(703) 746-6042 (for informal or draft communications, please label "PROPOSED" or "DRAFT")

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA, Sixth Floor, (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tilahun Gesesse whose telephone number is (703) 308-5873.. The examiner can normally be reached on Monday-Friday from 8:00 am to 4:30 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F. Urban, can be reached on (703) 305-4385. The fax phone number for this Group is (703) 872-9314. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 306-0377.
